WHO AM I

Senior Software Engineer with a unique background in business and marketing. Leveraging my analytical mindset and keen understanding of business needs, I specialize in developing robust and scalable AI systems, RESTful APIs, and event-driven microservices focused on efficiency and value.

HARD SKILLS

Python · FastAPI · Django · Docker · Kubernetes · Helm · Traefik · Taskiq · SQLAlchemy · PostgreSQL · MongoDB · Redis · Apache Kafka · GitHub Actions · GitLab CI/CD · Elastic Stack · Sentry · Pytest · DigitalOcean · GCP · AWS · Replicate · OpenAI · ComfyUI · Ollama · PyTorch · Diffusers · Transformers · InsightFace · OOP · TDD · SDLC

SOFT SKILLS

Problem solving · Decision-making · Teamwork · Communication · Critical thinking · Open-mindedness · Time management · Accountability · Adaptability

EXPERIENCE

Senior Software Engineer
Core Apps · Full-time · Remote
Aug 2024 – Dec 2024 · 5 mos

Combining roles of Backend Engineer, DevOps Engineer and ML Engineer, I designed and implemented from the ground up a production infrastructure for AI-powered iOS apps, delivering three Python-based backends in three months using cloud-native architecture, GPU-accelerated workloads, and multimodal AI processing (text, image, speech).

Senior Software Engineer
Sxipher · Contract · Remote
Dec 2023 – Apr 2024 · 5 mos

Being a member of the core team, I helped develop and launch a paid product in the cybersecurity space based on microservices, Python, FastAPI, Pydantic, Celery, RabbitMQ, Apache Kafka, PostgreSQL, SQLAlchemy, Alembic, Pytest, GitLab CI/CD, ELK, Grafana, Prometheus, Harbor, Docker, Kubernetes, Helm, Skaffold, Nginx, MinIO.

Senior Software Engineer
EPAM Systems · Full-time · Remote
Mar 2022 – Apr 2023 · 1 yr 2 mos

COURSES

Intermediate Machine Learning
Kaggle

Preparing for Google Cloud Certification: Cloud Developer
Coursera

Ultimate AWS Certified Solutions Architect Associate SAA-C03
Udemy

I joined the company as a mid-level engineer with Python.Core as a key skill and grew to Senior in 9 months while continuing to help customer solve its problems.

As a backend developer for provider of cloud and edge computing with a global infrastructure, I helped develop the IAM service with additional functionality.

I worked on enhancing the integration with Zendesk, HubSpot, Intercom and implemented an API rate limiter based on exclusive transaction-level advisory lock in PostgreSQL. And I redesigned the architecture of the Celery workers to separate responsibility and increase reliability. Also I improved the Drone Pipeline by updating steps to fail fast and added check for a pending migrations. I regularly performed debugging and fixed errors reported by Sentry, as well as reviewed several pull requests daily. Beyond coding, I participated actively in team meetings and collaborated closely with six backend developers, business analyst, delivery manager, and head of backend.

In this position, I utilized a comprehensive suite of technologies, including Python, Django, Django REST framework, Docker, Docker Compose, Harbor, Vault, Kubernetes, Grafana, Prometheus, Elastic, Node.js, Speccy, PostgreSQL, RabbitMQ, Celery, Poetry, Pytest, Coverage.py, Nginx, Git, Bitbucket, Drone CI, Sentry, Slack, and Jira.

Software Engineer
iTechArt Group · Full-time · Remote
Oct 2021 – Nov 2021 · 2 mos

It was a short but productive collaboration where in the 1st internal project I added SSO to the Django admin site, plus increased the test coverage with Pytest and Selenium. In the 2nd internal project, I went through the entire list of dependencies to identify and fix security vulnerabilities. Finally, in the 3rd internal project, I analysed the backend of the web application and gave tips on how to improve its scalability and maintainability.

Map Data Validator
Mapbox · Full-time · Hybrid
Sep 2019 – Aug 2021 · 2 yrs

I validated incoming edits from OpenStreetMap while maintaining SLA our team was responsible for and occasionally contributed to the OSM myself. Beyond that, I helped with short-term subtasks, now and then wrote GitHub tickets and participated in humanitarian mapping activities, such as during the flood in Japan in 2020.

Digital Media Planner
Zorka.Mobi · Full-time · On-site
Dec 2018 – Apr 2019 · 5 mos

Here I developed a model for predicting mobile app campaigns (Facebook, Instagram, Google, myTarget, In-App, Video Networks, VK, Snapchat, Twitter) and wrote a CLI tool with Python to automate these estimations.

Digital Marketing Manager
Kingmarket · Self-employed · Remote
Jun 2017 – Oct 2018 · 1 yr 5 mos

Besides promoting and developing the e-commerce business, I worked a lot on website design to improve UI/UX, not to mention quite an extensive communication with website developer, customer service of the hosting provider and other parties. Finally, I created bots to automate bid management on 2 key ad platforms using Python and Selenium.

Marketing Manager
Jakov & Co. · Self-employed · Hybrid
May 2014 – Apr 2017 · 3 yrs

In this business endeavour (a custom-made furniture with an online-first approach) I introduced and later evolved a growth strategy based on SWOT analysis and 7Ps of marketing mix, searched for local and foreign partners, tested hypotheses about customer segments, assortment, price positioning, contract manufacturing and outsourcing possibilities. I also created first website on Wix and then the second one on WordPress. In addition to promoting via multiple ad channels, I applied best practices of "white hat" SEO with decisions driven by data from Google Analytics.

Brand Manager
ZIKO · Full-time · On-site
Apr 2013 – Mar 2014 · 1 yr

As a representative of watch brands, I kept statistics per SKU with allocation of ABC and XYZ groups by sales in dollars and pieces, managed procurements according to the budget and distributed watches across the retail chain (mostly watches and jewellery), assessed knowledge of the shops staff and conducted training sessions for them, as well as collaborated with marketing department and HQs of the brands abroad.

Category Manager
Silverado · Full-time · On-site
Oct 2012 – Mar 2013 · 6 mos

I organized procurement and following distribution of goods to the company's electronics shops, searched for new suppliers and renegotiated the terms of existing contracts, conducted a market analysis and optimized warehouse stocks.
